- Improved wait time for I095-C Draft View to generate
- Resolved incorrect Stability Period Start Dates showing for some employees
- Fixed issue with Compliance Risk Report showing incorrect ACA Status
- Adjusted Designated Full Time Report to show accurate In Waiting Period column

Details

- **Revised How System Will Process Conflicting LOA And Payroll Records**

We have improved our solution to override LOA in certain circumstances. If you report an employee is on an unpaid leave of absence using the LOA file, but also begin including them within your payroll file with overlapping dates (i.e., they are receiving payroll while also on unpaid leave during the same period), we will override the LOA status to show that the employee is active and will receive credit for hours worked. Provide more visibility for the distinct types of breaks in service.

- **Improved Wait Time For I095-C Draft View To Generate**

We have improved the amount of time it takes to generate the I095-C Draft View report. In the previous version, a user selecting the Send Request to Update Data button may have had to wait up to 24 hours before receiving a notification that their report was ready.

- **Resolved Incorrect Stability Period Start Dates Showing For Some Employees**

Within the Measured Employees Report, some new variable hour employees may have had a stability start date which started on a day other than the first day of the month. Stability period start dates should always start on the first day of any given month and our system has been updated to reflect this.

Details Cont.

- **Fixed Issue With Compliance Risk Report Showing Incorrect ACA Status**

In some instances, we found that the Compliance Risk Reports were showing designated full-time employees not being offered coverage, when their actual status was calculated full-time. This issue has been resolved.

- **Adjusted Designated Full Time Report To Show Accurate In Waiting Period Column**

The Designated Full Time Employee Report was not accurately reflecting if an employee was in the IRS allowed 90-day waiting period. Those employees hired within the last 90 days will now display YES under the In Waiting Period column.
